WHAT A RESEARCH PAPER IS

A research paper is an entirely new work, one you create, one that can be found on the pages you have written. It has a number of qualities that reflect *you*, that make it your special creation.

It synthesizes your discoveries about a topic and your judgment, interpretation, and evaluation of those discoveries. 1 _____ But all that collected material would be a paper without value unless you weighed the discoveries you made and drew conclusions from them. Because you are very much involved in a research paper, the entire work reflects your own ideas as much as those of anyone else who has worked on the subject. Selecting information to use is a personal process. Deciding how to approach this information, developing a point of view toward it, and, finally, choosing your own words to present it are all highly personal activities. 2 _____.

3 _____. The paper resulting from your study, evaluation, and synthesis will be a totally new creation, something YOU originate. True, you will have put many hours of thought and much effort into a work that takes only a short time to read. But that is the way of any creative endeavor. Moreover, it's a real art to make the difficult appear easy, not to let an audience be aware of preparation and practice. 4 _____.

It acknowledges all sources you have used. So basic is documentation and acknowledgment to research papers that a series of customs or conventions has developed for crediting what is borrowed from other people. 5 _____. Finding information and making it available to others, whether in writing, orally, or on film is hard work. Just as you do these tasks for a research paper, so others have done the same (or similar tasks) for what became your sources. So although your research paper is a new and original work, it would not have been possible without the various sources you consulted to prepare it. Acknowledging that debt to others is only right and fair.

A. It is a work that shows your originality.

B. There is a reason even more compelling than custom for acknowledging your sources: an ethical one.

C. The discoveries consist mostly of the ideas, knowledge, and actual words of people who have written, spoken, or made pictures about the field you have investigated. They came from both print and non-print sources (when possible).

D. If you are satisfied simply to repeat the conclusions of other people without weighing them against what you have learned, you will perhaps end up producing a satisfactory report of those findings rather than a research paper.

E. The papers that read most easily are often the result of the most work, and the fact that you have created an original paper will be evident.

F. Therefore, the resulting research paper will be more your own to the extent that you involve yourself in these activities.
