Summer School 2014
Ulyanovsk / Russia

Ulyanovsk State
Technical University

Ulyanovsk State Technical University

offers 4 Summer Schools
for international students in 2014:

1. Geology and paleontology of the Volga region «On the trails of dinosaurs»
2. Earth through the cockpit
3. Theory and practice of programming
4. CALL of Russia (Culture, Architecture, Language and Literature of Russia)

City of Ulyanovsk

Ulyanovsk is a city on the banks of the rivers Volga and Sviyaga.

The former name of the city is Simbirsk, it was founded in 1648 as a defending fortress. Present name is inseparably linked with the name of Vladimir Ulyanov-Lenin, who was born here in April, 22 1870.

In Simbirsk-Ulyanovsk lived and created many remarkable writers, poets, arts, etc.

Now Ulyanovsk possesses huge cultural wealth. Buildings, houses and memorable places, which in majority have already become a part of present-day Ulyanovsk, are precious "witnesses" of historical events to descendants.

Welcome!

We are happy to invite you to join International Summer School in Ulyanovsk. UISTU summer school programs are vast multicomponent educational courses with integrated classes and field trainings supported by a diverse culturological and entertaining program, introducing the history and culture of the Volga region.

Tagret group: students of all majors, studying Russian language, culture or history; looking for new experience and craving for exploration

Entertaining part combines sports activities, workshops, museums, out-of-town guided tour and a 3-day vacation at summer camp located at a picturesque site on the bank of the Volga river.

Each program worth 5 ECTS credits.

Summer School programs

Classes are hold in groups of 10-15 students

Duration: August 11-24, 2014

Class hours: 24 hours/ week - theoretical course and about 20 hours/week of practical trainings

Deadline for applications is May, 26 2014

Language of tuition: English, Russian, German (conference translation is provided)

Language courses: elementary, advanced and proficiency levels

At the end of the summer school students receive a certificate with 5 ECTS credits and complete course materials.

Earth through the cockpit

School course includes lectures and practical trainings on designing and operation of modern airborne information systems. Upcoming trends of avionics systems designing will be discussed.

Avionics systems design concepts, architecture, structure and functional solutions, on-board interfaces, work with e-maps, meteo- and teleinformation, synthesized 2D and 3D graphics will be considered.

Tagret group: young people looking for new experience, willing to combine introduction to another culture, language practice with professional trainings and lectures on aircraft instruments building, modern display systems, etc.

Language of tuition: English or German and Russian (lecture translation is provided)

Language courses: elementary level (advanced level - on request)

Geology and paleontology of the Volga region "On the trails of dinosaurs"

The program consists of lectures and lab exercises on geology and paleontology, including lots of visual information in the form of illustrative materials, presentations, special equipment.

Students will learn the basics of geology and the geological composition throughout the region and the world.

Tagret group: students willing to combine introduction to another culture, language practice with professional trainings on geology, paleontology, culture and history; interested in traditions and customs of other countries; craving for exploration.

Language of tuition: English or German and Russian (lecture translation is provided)

Language courses: elementary level (advanced level - on request)

Call of Russia (Culture, Architecture, Language and Literature of Russia)

Lectures on the ancient history, history of native settlements and their habit on the territory of the middle Volga region and some others are considered within the course.

Classes are hold by highly qualified staff headed by Professor Vitaly Tur, the dean of the civil engineering faculty.

Tagret group: students of philology and linguistics, civil engineering students; students of historical departments and other students interested in language, literature, architecture, history and culture of Russia and its regions.

Language of tuition: English and Russian (lecture translation is provided)

Language courses: advanced and proficiency levels

Theory and practice of programming

The school course includes lectures as well as a full-time internship at one of the international IT companies founded and based in Ulyanovsk with worldwide known projects, such as Ecwid (<http://www.ecwid.com/>), Qualiteam Software Limited (<http://www.qtmssoft.com/about.html>), SimbirSoft (<http://simbirsoft.com/>), ITECH.group (<http://itech-group.ru/>).

During the internship students will participate in real projects as well as receive individual assignments.

Tagret group: students of technical majors, interested in mathematics, computing and their application in programming

Language of tuition: English and Russian (lecture translation is provided)

Language courses: elementary level (advanced level - on request)
